

A Global Ecosystem of Even, Loving Care

Strategic Overview, Governance Roadmap & Community Dialogue

Structure: Community Interest Company (CIC)

Visionary Lead / MD: Martin McClure

Location: Workington, West Cumbria

Executive Statement: Fully Self-Sustained & Deliberately Paced

The Blue Sky Ecosystem Projects CIC is currently **100% self-sustained and self-funded out of pocket**. We have chosen to self-fund our startup phase to ensure complete operational independence, rigorous governance, and zero debt. We are deliberately pacing our journey because genuine, trauma-informed community infrastructure cannot be rushed.

Open Invitation: Dialogue, Ideas & Potential Donor Partnerships

Please contact us should you wish to discuss anything regarding points of view, funding, or if any donors would like to come forward. We are actively open to all constructive voices, lived experiences, and strategic guidance during this foundational build phase. We warmly welcome and will work closely with anyone who wishes to become a meaningful part of our journey.

1. Current Progress & Governance Dashboard

We have met nearly all of our foundational benchmarks, embedding ethical governance and statutory accountability into our structure:

Governance & Structural Pillar	Current Status	Operational Detail
Internal Governance Model	Active	Clear ethical stewardship and trauma-informed board oversight.
Co-operative Bank Account	Operational	Ethical, transparent banking infrastructure fully established.
School for Social Entrepreneurs (SSE)	Active Course	Undergoing formal social enterprise leadership training.
Statutory & Public Liability Insurance	Finalizing Next Week	Securing comprehensive coverage for public and volunteer safety.
Asset Lock Architecture	In Process	Legal protection securing all assets solely for community benefit.
ICO Data Protection Registration	In Progress	Formalizing GDPR compliance and strict confidentiality protocols.
Net Zero & Environmental Alignment	Active Strategy	Curricula & workshops designed to minimize carbon footprint.

2. Our Core Purpose & Long-Term Vision

Our Grounded Mission

To cultivate structured, accessible spaces where individuals navigating trauma, grief, isolation, or domestic strain find grounded peer support to rebuild their lives with dignity.

Our Umbrella Vision

To evolve into an umbrella ecosystem that supports grassroots changemakers with shared stewardship and distributes targeted emergency micro-grants directly where need is greatest.

3. Educational Workbooks to Facilitated Cohorts

FUTURE PROJECTIONS: 6 MONTHS TO 1 YEAR HORIZON

Our workbook-to-course pathways are strictly **future projections**. We are committed to a slow, steady progression: group workshops will only commence following thorough production, practical testing, and evaluated community feedback from our workbooks.

1. Grief & Loss Support Modules

An 8-part trauma-informed pathway guiding participants through bereavement, emotional overwhelm, and practical grounding tools. Designed for quiet personal reflection before peer discussions.

2. Relationship Accountability & Conflict Resolution

A 6-week curriculum focused on healthy boundaries, emotional regulation, and lived-experience accountability to help break destructive cycles in domestic and family dynamics.

3. Group & Digital Delivery Format (Future Horizon)

Projected small-group cohorts capped at **up to 10 participants** to preserve intimacy and emotional safety, offered through in-person West Cumbria community venues and remote online access.

4. Companion Books & Volunteer Engagement

Seeking Companion Book Testing Volunteers:

As part of our measured build phase, we are looking for compassionate individuals who would like to take part in completing, evaluating, and providing constructive feedback on our companion workbooks. Once statutory requirements and insurance sign-offs conclude next week, we will steadily establish our volunteer safeguarding framework.

5. Transparency, Monthly Updates & Direct Contact

We believe accountability is maintained through open communication. Visitors, collaborators, and prospective partners can track our continuous development through our **monthly website updates** at www.blueskyprojects.org.uk.
